Summary

Software Engineer focused on backend development, building APIs and systems with Python, FastAPI, and PostgreSQL, backed by a strong foundation in data structures and algorithms. Currently building backend projects, including an authentication/IAM system, while working as a Technology Mentor teaching AI, coding, and robotics. Seeking Software Engineer / Backend Developer roles.

Experience

Software Developer

Sep 2025 – Dec 2025

Swetrasoft, Tranås, Sweden | Remote

- Contributed to design, development, and testing of iOS application features as part of a cross-functional remote team
- Managed sprint workflows and task tracking via Jira in an Agile development environment
- Applied software quality assurance principles and participated in code review cycles
- Strengthened async collaboration and communication across international time zones

Technology Mentor

Apr 2026 – Present

InnovaTe X, Nagarkurnool | On-site

- Deliver AI, Robotics, and Programming education to students in Grades 6–10 through project-based STEM learning across CBSE partner schools
- Design and conduct hands-on technical sessions, translating complex concepts into structured, accessible lessons for non-technical learners

Machine Learning Intern

Dec 2025 – Mar 2026

Tanvika Solutions Pvt. Ltd., Kakinada | On-site

- Independently built and deployed AI Interview Performance Analyzer - multimodal pipeline combining CNN-based facial emotion recognition (PyTorch) with NLP speech evaluation
- Independently built and deployed Car Price Prediction MLOps Pipeline – Random Forest regression with Docker containerization and GitHub Actions CI/CD automation
- Applied modular code structure, artifact management, and containerized deployment practices across both projects

Data Analyst Intern

Apr 2025 – June 2025

ULEARN, Kakinada | Remote

- Analyzed India Air Quality Index (AQI) dataset using Power BI, building multi-view dashboards and a 30-slide analytical report for stakeholder presentation

Projects

Store Rating & Review Platform

GitHub

- Built a full-stack platform with role-based access control across Admin, Store Owner, and Normal User roles, enforced via JWT authentication and route-level middleware
- Designed a relational schema with foreign-key relationships across Users, Stores, and Ratings, supporting per-store analytics and role-scoped data access
- *Stack:* React, Node.js, Express, PostgreSQL, JWT, RBAC

Car Price Prediction – Production MLOps Pipeline

GitHub

- End-to-end ML pipeline with Random Forest regression, modular preprocessing, and full evaluation suite (R^2 , RMSE, MAE)
- Containerized with Docker, automated with GitHub Actions CI/CD, deployed via Streamlit for real-time inference
- *Stack:* Python, Scikit-learn, Docker, GitHub Actions, Streamlit

AI Interview Performance Analyzer

GitHub

- Multimodal AI system combining CNN facial emotion recognition with NLP speech evaluation pipeline — evaluates confidence, sentiment, and communication quality
- *Stack:* Python, PyTorch, CNN, NLP, OpenCV, NLTK, Streamlit

Technical Skills

- **Languages:** Python, SQL, JavaScript
- **Backend & Web:** FastAPI, Django, Flask, PostgreSQL, REST APIs
- **DSA & CS Fundamentals:** Data Structures & Algorithms, OOP
- **Engineering & Deployment:** Docker, GitHub Actions (CI/CD), Git, Linux
- **ML & Data:** PyTorch, TensorFlow, Scikit-learn, NLP, Computer Vision, Pandas

Education

B.Sc. Artificial Intelligence

Aug 2023 – Apr 2026

Aditya Degree College, Kakinada

CGPA: 8.0 / 10

Relevant Coursework: Machine Learning, Deep Learning, Data Structures & Algorithms, Mathematics for AI, Computer Vision, Natural Language Processing

Activities: Lead, John McCarthy AI Club (Oct 2023 – Apr 2026) — coordinated AI/ML academic initiatives, mentored junior students, organized technical workshops

Certifications

- Algorithms: Design and Analysis, Part 1 – Stanford Online (edX)
- Introduction to Containers, Kubernetes and OpenShift – IBM
- SQL (Basic) – HackerRank
- Analyzing and Visualizing Data with Power BI – Microsoft
- Python for AI & Development – IBM (edX)
