

Mohammad Alquamah Ansari

Kakinada, Andhra Pradesh, India

alquamahansari@gmail.com | +91-9154192054 | github.com/alqamahansari | linkedin.com/in/alqamahansari | alqamahansari.github.io

Summary

ML Engineer with hands-on experience building and deploying end-to-end machine learning systems. Independently shipped two production ML systems during internship — a multimodal AI pipeline combining CNN-based facial emotion recognition with NLP speech evaluation, and a full MLOps pipeline with Docker, CI/CD automation, and Streamlit deployment. Strong foundation in deep learning, NLP, and ML infrastructure. Seeking entry-level ML Engineering or MLOps roles at teams building real-world AI systems.

Technical Skills

- **Languages:** Python, SQL, JavaScript
- **ML & Deep Learning:** PyTorch, TensorFlow, Scikit-learn, XGBoost, CNN, LSTM, NLP
- **MLOps & Deployment:** Docker, GitHub Actions (CI/CD), Streamlit, Flask, FastAPI
- **Data & Visualization:** NumPy, Pandas, Matplotlib, Power BI, DAX
- **Tools & Platforms:** Git, GitHub, Linux, HuggingFace, Jupyter
- **Domains:** Computer Vision, Natural Language Processing, Time-Series, LLM Systems

Education

B.Sc. Artificial Intelligence

Aug 2023 – Apr 2026

Aditya Degree College, Kakinada

CGPA: 8.0 / 10

Relevant Coursework: Machine Learning, Deep Learning, Data Structures & Algorithms, Mathematics for AI, Computer Vision, Natural Language Processing

Activities: Lead, John McCarthy AI Club (Oct 2023 – Apr 2026) — coordinated AI/ML academic initiatives, mentored junior students, organized technical workshops

Experience

Machine Learning Intern

Dec 2025 – Mar 2026

Tanvika Solutions Pvt. Ltd., Kakinada | On-site

- Independently built and deployed AI Interview Performance Analyzer — multimodal pipeline combining CNN-based facial emotion recognition (PyTorch) with NLP speech evaluation, generating structured interview scores and performance feedback reports
- Independently built and deployed Car Price Prediction MLOps Pipeline — Random Forest regression with Docker containerization, GitHub Actions CI/CD automation, and Streamlit real-time inference interface
- Owned full ML lifecycle from data preprocessing and feature engineering to model evaluation and production deployment with zero senior ML guidance

Software Developer Intern

Sep 2025 – Dec 2025

Swetrasoft, Tranås, Sweden | Remote

- Contributed to iOS application development as part of a cross-functional remote team
- Managed tasks and sprint workflows via Jira across Agile development cycles
- Strengthened async collaboration and communication across international time zones

Data Analyst Intern

Apr 2025 – May 2025

ULEARN, Kakinada | Remote

- Analyzed India Air Quality Index (AQI) dataset using Power BI with DAX-based calculated measures and multi-view interactive dashboards
- Compiled 30-slide analytical report supporting environmental and health trend analysis for stakeholder presentation

Projects

AI Interview Performance Analyzer

GitHub

- Multimodal AI system combining CNN facial emotion recognition with NLP speech evaluation pipeline — evaluates confidence, sentiment, and communication quality
- Generates structured interview scoring and performance feedback reports

- *Stack*: Python, PyTorch, CNN, NLP, OpenCV, NLTK, Streamlit

Car Price Prediction – Production MLOps Pipeline

GitHub

- End-to-end ML pipeline with Random Forest regression, modular preprocessing, and full evaluation suite (R^2 , RMSE, MAE)
- Containerized with Docker, automated with GitHub Actions CI/CD, deployed via Streamlit for real-time inference
- *Stack*: Python, Scikit-learn, Docker, GitHub Actions, Streamlit

Facial Emotion Detection System

GitHub

- CNN-based deep learning system for multi-class facial emotion recognition with structured training, evaluation pipelines, and image preprocessing
- *Stack*: Python, TensorFlow, OpenCV, CNN

Depression Detection from Text

GitHub

- NLP text classification system identifying depression indicators in written content using preprocessing, feature extraction, and model evaluation
- *Stack*: Python, Scikit-learn, NLP, NLTK

Certifications

- Algorithms: Design and Analysis, Part 1 — Stanford Online (edX)
- Statistical Learning with Python — Stanford Online (edX)
- Scientific Programming for AI with Python — RWTH Aachen University
- Python for AI & Development — IBM (edX)
- Introduction to Containers, Kubernetes and OpenShift — IBM
- SQL (Basic) — HackerRank
